## TO BOOK AN APPOINTMENT

*please contact:*

—— **ASHTEAD HOSPITAL** ——

The Warren,  
Ashted,  
Surrey, KT21 2SB  
T: 01372 221400

Mr Piotr Swiatek is an approved CLEARWAX ear wax removal specialist in Surrey who has been ENT-trained to perform endoscopic ear wax removal, including E-suction™, to safely clean and clear your blocked ear. Unlike ear syringing and irrigation which attempts to flush out ear wax blindly by pumping water in your ear, E-suction™ gently vacuums ear wax out of the ear under direct vision using our specially developed iCLEARscope™ endoscope.

## EAR WAX

The bodily process of producing ear wax is completely natural. For many people ear wax goes unnoticed and does not cause any complications. Ear wax usually migrates out of the ear and does not cause any problems. However, in some people this does not occur and can build up and become impacted inside the ear canal.

## MICROSUCTION

It is a safe and comfortable method of earwax removal. A microscope and a finely balanced medical suction device is used to remove the ear wax. The fact that we can clearly see the ear canal and what we are doing makes it exceptionally safe. With no liquids involved it is especially comfortable for the patient and it is usually undertaken in a few minutes. A typical appointment to remove wax from both ears should take no longer than 30 minutes.

## EAR DROPS

Use of ear drops for 3-5 days initially, to soften wax is recommended. They can be purchased from a pharmacist or supermarket without the need for prescription, although usually under guidance from a GP, nurse or a medical professional.

## HOME VISITS

Not everyone is able to get to the clinic for medical treatments. Audiology Plus will use portable equipment to provide audiological assessment, hearing aids fitting, hearing aids repairs and ear wax removal in the comfort of your home. Home Visits are suitable for all clients, GP referral is not required.
